Subject: Re: Fw: Draft Talking Points for Today's Senate

All recently completed building projects incorporate sustainable design initiatives reflecting our 2000 Sustainable Development Plan which has received national recognition as a model for sustainable building in the university setting.

The ¹Lillis Business Complex, the ²Moss Street Children's Center, and the ³Many Nations Long House exhibit innovative and progressive elements of sustainable design.

The ⁴Music and Education projects ⁵now in construction each incorporate significant sustainable design elements.
